The industry is flooded with "good quality" films which are only going to be worth the sum of the parts they are made out of. That is why there will always be a big gap between good (films) and great work. The quality of the material, the way the actors are filmed, even how the camera is set-up, are all things that have to be made better, as the studios will only give the same film to a number of people to shoot it, so the amount of money is usually far less than what they would actually get..
